

What we tested and what changed

This is a simple view of the digital store model. We created a digital clone of one V-Mart Unlimited store on a Diwali Saturday, then tested better ways to run the same store with the same shopper demand.

POLICIES TESTED

34

REVENUE LIFT

+35.9%

Plain-English result: the best policy recovered about ₹2.01L per peak day by opening counters earlier, moving staff to busier areas, managing trial rooms better, refreshing key displays, and placing related outfit items together.

The levers we changed

LEVER	BASELINE	OPTIMIZED POLICY
Billing	Counters open after queues form.	Counters open before peak demand.
Staffing	Breaks overlap and staff stay fixed in zones.	Breaks are staggered and staff move to busy zones.
Trial rooms	Loose management and no active item cap.	Attendant at the women trial bank with a four-item cap.
Merchandising	Power wall and impulse fixture stay mostly static.	Key displays refresh during the day.
Cross-sell	Related products sit in different areas.	Outfit bundles and footwear are placed closer together.

What SKUs are in the model

The model uses 100 SKUs across apparel, footwear, accessories, kids, infants, and entry displays. The table below summarizes the SKU mix by store area.

STORE AREA	SKUS	SKU TYPES	DIWALI PRICE RANGE	EXAMPLE ITEMS
Women ethnic	16	kurti, kurti_set, lehenga, saree, suit_set	₹491 to ₹3,749	Cotton printed straight kurti, 3/4 sleeve, knee-length; Rayon A-line kurti with embroidered yoke
Women western	15	bottoms, co_ord, dresses, innerwear, nightwear...	₹239 to ₹1,199	Solid cotton round-neck t-shirt; Printed casual top, half sleeve
Kids	15	boys_4_8, boys_8_14, boys_ethnic, footwear, girls_4_8...	₹359 to ₹1,169	Printed t-shirt and shorts set; Cotton shirt with full pants

Power wall	2	unisex_acc	₹224 to ₹374	Sunglasses, plastic frame, UV-protected; Cotton cap, printed

What the shopper profiles look like

Each digital shopper belongs to a profile with a different mission, basket size, patience level, and shopping path.

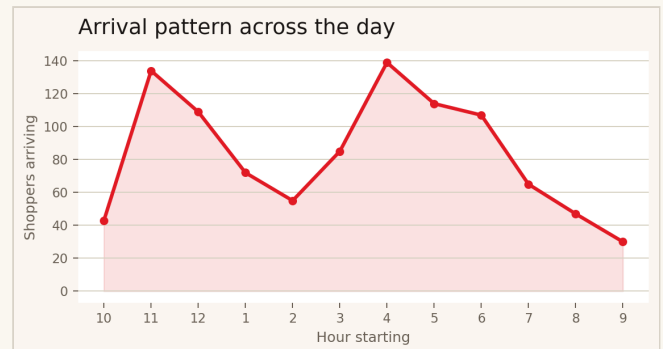

PROFILE	SHARE	TYPICAL BASKET	MAIN ZONES	PLAIN-LANGUAGE BEHAVIOR
Mission-driven mom	22%	4 to 7 items	womens ethnic, kids	Family group of 2-4 including 1-2 kids.
Young mom with toddler	8%	2 to 4 items	infants, kids	First-time Diwali shopping with a 0-3 year old in tow.
Family weekend shopper	18%	6 to 10 items	womens ethnic, mens formal ethnic	Group of 4-6, multi-generational, Diwali-and-wedding-season mode.
Browse-and-buy young woman	13%	2 to 4 items	womens ethnic, womens western	Solo or with a friend.
Working woman - time-constrained	8%	1 to 3 items	womens ethnic, womens western	Solo female, post-work or lunch-break.
Premium occasion shopper	5%	1 to 2 items	womens ethnic, womens fa	Solo or with one friend.
Quick-trip men's wear	8%	1 to 2 items	mens casual, mens formal ethnic	Solo male, often dropped off by family.
Office-gifting shopper	4%	4 to 6 items	mens formal ethnic, womens ethnic	Solo, buying 4-6 similar kurtas to give as Diwali gifts to office team or family.
Visiting relative / out-of-towner	5%	3 to 5 items	womens ethnic, mens formal ethnic	Visiting Bangalore for Diwali.
Browser, no purchase intent	9%	0 to 1 items	power wall	Walks 1-2 zones, walks out.

Two simple distributions

Shopper mix

Arrival pattern

These distributions are why the store gets stressed in specific places. Families and mission-led shoppers create larger baskets. Evening arrivals create pressure at billing and trial rooms.
